A mysterious game full of illusions, can you deal with those illusions?. Just another trash game to earn money by selling Trading Cards.. This is one of my favorite Nancy Drew games. It has a nice balance between sleuthing and puzzle solving, which is something that many of the newer games in this series are lacking. The plot isn't very complex, but it is interesting and had some unexpected twists. If you enjoy point and click mysteries, I think you will like this game a lot.. With a title like Mars Simulator, you would expect a simulation of Mars. Alas, Planetbase or Sol 0 do a far better job of simulating the red planet. John Carter of Mars did a better simulation. The game thinks so little of its subject matter that it relies on fantasies of alien artifacts and glowing crystals to stretch the content beyond 4 missions. The lexicon is limited to a short list of statistics, condensed from Wikipedia. The mars rover, the star of the show, doesn't handle as well as my lawn mower. But it does have the same navigational system. Scratch that - with my lawn mower, I can at least follow my tracks.

Imagine the thrill of exploring Mars without a sense of direction (no compass) or location (strategic map looks like a square of sandpaper, with blots). Where is south? Which blot is that cliff wall?

But now I am just getting snarky.

If you must buy this, wait until the price goes down to, say, \$1.50 Cdn.. Pretty addictive and challenging, your reflexes will really be put to the test as you figure out how to chain rockets together for those massive combos.. Be prepared to contort, suck in your gut, hold your breath, crawl around your playspace, and laugh.

Performance wasn't great before on a minimum-spec machine. Not sure if it was my GPU upgrade or the recent update, but runs great now.. If you get this as a bundle, sure. But buy skins? Waste of money.. Arvale is quite a fun adventure that has me hooked! This old-school RPG takes me back to my Final Fantasy on SNES days. Yet it's a fresh take on the genre, with plenty of hilarious dialogue, and an almost graphic adventure-like treatment throughout. Duncan has something witty or random to say for just about every object or character you come across.

So far the story moves along nicely and keeps me wanting to find out what Duncan will remember next. The battle mechanics are a throwback to the old Final Fantasy system - not overly complicated and easy to use. I enjoy that. I find the battle difficulty strikes a good balance. It can be challenging, but never ridiculous and so far I haven't been subjected to any prolonged amount of leveling-up just to clear a dungeon of boss.

The graphics are great - exactly what I'd expect for a 16-bit era game. The soundtrack is phenomenal and catchy. Just like an FF game, it beautifully sets the tone for the all places you visit. Play controls can be with the mouse or keyboard. Overall, I'm very happy with it - excuse me, gotta play some more!. This got many of the emoji that one knows and may even love. As many of the other player states the DLC is the easiest to complete of them all and I do understand their frustration with it.

I don't find it a problem though as it's pretty relaxing and it's what the main purpose of the 'game' is about afterall. It offers you a break from the really tedious and complex ones that otherwise exists in the package.
. Only logical to buy a Season pass - that way everything will be at a reasonable price.

Great DLCs, the best costumes in the franchise.

10/10

Sisyphus Reborn is free to play for everyone, those who liked it can afterwards buy for not even a buck this mini-DLC to support the developer and also get some additional content.

In times where microtransactions are pretty much a necessity in full-price AAA games, this is just the most fair and honest way to finance a game i've seen by now.

A game? What am i talking? This might be interactive media, but is far from being "played", it is experienced.. She said "I love you..."

And I said "u ugly"

Her Father killed me. The END.

10/10. Tails is the first game I've played that makes thorough use of room-scale VR, which in most other titles feels like an afterthought. Peaceful, compelling, flowy-shiny-dragon gameplay that leaves me feeling like I just got a shoulder massage. Very worth it.

I wish I had some sort of directional auditory hint as to where a new lantern has appeared; often I spend 5-8 seconds just trying to spot it. Lanterns make a sound when they appear, but as far as I can tell the sound isn't directional.. Legit this weapon pack is just for the lols, they all have nice stats but are mainly for looks :P. I got this DLC in the complete pack. All off them suffer from the same flaws so this review is copied to all of them.

Now. The skins and weapons are totally fine. The problem here is the extreme pricing and the fact that this game has a modding community with better, free, stuff. They even admit that a lot of this is made by said community. I as a console peasant and a sucker did not get this simple fact and pronounced "Yes! I do want to pay more!"

Don't be like me. Don't suck, blow wait, what?. Excellent strategy in the setting of WW II.. Best tower defense game gets better! Ups the challenge quite a bit, thank god for the rewind button.. QUICK Review
Game is good

But its easy

Bus should cost you money to use i would of lost like 10times over while playing

Stuck with no money drugs in the bag but with the bus not costing you a penny to easy to get about earn a profit

i recomment for time wasting but i am looking into a new weed game. Honestly, I find it more fun sometimes than games I've paid 20-40 bucks on. Definitely Reccomend for ♥♥♥♥ing around with friends.. The best game ever
