Asset Managers can audit workstations and get hardware and software reports for fine-grained control. ManageEngine Asset Explorer helps you create focused asset groups for better management and control. Track Asset Ownership details to get a clear picture of who owns what. Track Asset Ownership details to get a clear picture of who owns what ManageEngine Asset Explorer Description: ManageEngine Asset Explorer is a comprehensive and reliable asset management application that can provide you with various tools to help you in your work. It offers enterprise-wide asset visibility and control to manage all your IT and Non-IT assets. IT offers a single view to track and manage ownership of all your assets. ManageEngine Asset Explorer helps you scan and audit your networked workstations. IT scans your network and automatically discovers all software available in each of the workstations. Asset Managers can audit workstations and get hardware and software reports for fine-grained control. Asset Managers can audit workstations and get hardware and software reports for fine-grained control. You can track Vendor for all unauthorized asset installations, track Asset Ownership details to get a clear picture of who owns what. Get detailed hardware inventory reports about workstations in the network such as OS details, CPU details, network information, hard disk

IT assets can often become a burden and a requirement to manage them is time consuming. Asset Explorer can help you to keep track of all assets using a tool that is simple to use and does not require IT employee support. Asset Explorer has a one-time payment and no long-term obligations. Asset Explorer is available as a SaaS service through a hosting model. With this service, you can host up to 25,000 accounts. The IT employee does not need to manage assets using Asset Explorer. It scans and reports all computers including Windows, Linux, Mac and iOS. It monitors compliance with licenses and operating systems and offers an auditing trail to help in ensuring compliance. Asset Explorer can be used for both asset collection and asset reporting. Asset Collectors scan computers on your network and can collect details about each computer. Asset Managers use the details to keep track of all the computers. Asset Managers can view reports for complete inventory, hardware details, software details, operating system details, network details. Asset Managers can audit the user and group details for more control and set roles and permissions. Out-of-the-box, Asset Explorer does not require any special configuration and is a ready to use tool. Asset Explorer is available on three different plans. Please choose your desired plan based on your needs. Plan Features: Enterprise License Plan 60,000 License units You can use Asset Explorer Enterprise license plan to install and manage up to 60,000 enterprise-wide accounts using this license. The license can be used for unlimited number of users without expiry. This license is ideal for large organizations with single sign-on. Platform Licenses 3,000 License units Asset Explorer is sold in three platform licenses. A
