General: The film was directed by Kamal and produced by Kamal Hassan's production company Rayalaseema and Poornima. The .Q: How to create a list of keywords and feed it to elasticsearch query? I'm trying to create a list of keywords and then feed it to the query. So far I've got: keyword(\$key); } // Build up the query with filter values \$query = new \Elasticsearch\Indices\Query(); foreach(\$keys as \$key) { \$query->keyword(\$key); } // Build the query string \$query_string = \$query->toString(); \$params = ['index'=>'activity_log', 'body'=>['query'=>['bool'=>['must'=>\$query_string]]]]; // Get the results \$t->search(\$params); ?> My output is { "aggregations": { "all": { "buckets": [{ "key": "status", "doc_count": 1 }, { "key": "date", "doc_count": 1 }, { "key": "summary", "doc_count": 1 }] } } }
